

30 Day Trial System

With complete documentation and full system support

Want to extend your trial?

Pick an extension option

OPTION 1

Certification

Specification control for chemical & mechanical

Internal aims Chemical control

Multiple cert types (3.0, 3.1, etc)

Automatic chemical results, import from spectrometer

Automatic mechanical results, import from tensile test machine

Automatic import of chemical overrides (carbon/sulphur analysis etc)

Multiple specifications per heat

OPTION 2

Serialization

Configure serialization method by part number, family, mold or system wide

Lot number tracking (group of serial numbers)

Available in shop floor data collection module

Route card per serial number

Route card per lot (with breakdown of serial numbers)

OPTION 3

Quality Control

Approved supplier management

Supplier delivery performance

Supplier PPM

Supplier corrective action tracking

Customer delivery performance (deliver & in full on time)

Customer PPM

Tool usage & recalibration/refurbishment tracking

Continuous improvement cycle

OPTION 4

Quality Plans

Part/customer specific plans

Plan modification by sales order line item

Specification override of chemical element range

Results by material batch

Results by serialised casting

Result output onto chemical/mechanical certificate

Result on certificates by batch/serialized casting

Import data from other sources eg. CMM machine

Recording extra resource utilization
